

Homework Assignment 1

Due: September 10 at 11:59 pm

Exercise 1 (10 points)

Write a program that prints an animal speaking a greeting, similar to (but different from) the following. You should create **at least 2 commits** while working on this homework.

Check out <https://asciiart.website/> for inspiration.

```
  /\_/\
 (  '  ) / Hello \
 (  -  ) < Junior  |
  ||||  \ Coder! /
  _||_  -----
```

Submission

1. Push your project directory along with the source to GitHub by the due date.
2. Invite and share your project repository both graders (yan.chen01@sjsu.edu and pradeepikag151@gmail.com) and if GitHub allow you, me as well (mariia.surmenok@sjsu.edu) or by usernames: **yanchen-01 pradeepikag151 msurmenok**
3. Submit a Readme.txt (or pdf/doc file) to Canvas including your name, repository access link, instructions to run your program (if any), **snapshot of your running program (screenshot of your output)** and citations (if any)
4. Your project directory will be graded according to the state your project directory was in at due time.
